# SURFACING

Playground surfacing, whether wood or rubber mulch, sand, or other material, is used in playgrounds for impact attenuation. It provides cushioning to reduce the risk of injury from falls and can also help with drainage and maintenance.

## **RECYCLED RUBBER MULCH**

- Exceptional shock absorbency
- Reduced risk of playground injuries
- 12 year color guarantee!
- It will not blow away or wash away in storms
- Reduces bug and rodent infestation and does not attract ants
- Will not decompose or compress
- Weather-Friendly, never freezes
- Always dry and ready to play almost immediately after even the heaviest rain
- Rainproof, does not retain moisture, slipperiness or dirt
- Our mulch is 99.9% steel free
- All our products are proudly made in the USA, and are GSA, ASTM and IPEMA certified.

## **WOOD MULCH**

For a traditional play area, we also offer wood mulch. Enjoy a play area like you had when you were a kid!

## **BEUTA LANDSCAPING EDGING**

Keep your play area neat with our flexible plastic edging that looks similar to natural stone and installs quickly and easily.

## **WEED GUARD**

Keep the weeds outside of your play area with our landscaping screen! Our weed guard comes in wide rolls and can be cut to the desired length of your playground site.
